A POCKET LIST OF AUSTRALIAN BIRDS compiled by P. J. Fullagar for the A.C.T. Branch, R.A.O.U., 20 pp. Price six for \$1.00 or 20c. each (plus 5c postage).

This is a list of some 760 species (and some easily recognised races) of birds recorded for Australia and Tasmania, including established introductions, designed for use as a 'field card' for keeping basic records when travelling, records of birds of an area, or other similar uses.

Vernacular names only are used, plus five columns about a quarter inch square for the briefest of notes. The order differs from that of the R.A.O.U. *Checklist* and follows that now generally accepted by most authorities. The names themselves vary in a number of cases from those of the *Checklist*; the new names often being a distinct improvement, and on the whole are definitely to be preferred to many of the new vernaculars used in recent editions of Cayley's *What Bird is That?*

These lists are obtainable from S. Marchant, 36 Arthur Circle, Forrest, Canberra. 2603.
