SOUTH AUSTRALIAN ORNITHOLOGICAL ASSOCIATION

A HANDLIST OF THE BIRDS OF SOUTH AUSTRALIA

The second, revised and enlarged edition of this work by H. T. Condon has now been published and is available from the Hon. Secretary for $3.00 (post paid).

NOTE TO CONTRIBUTORS: Authors of papers (except those of a taxonomic nature) and contributors to the annual Bird Report are asked to follow the order and nomenclature of this Handlist. It is further suggested that those forms of a species that are readily separable in the field be given separate vernacular names—these are given by Condon with the appropriate subspecies. For example, Crimson, Yellow and Adelaide Rosellas should be differentiated, *likewise* Spur-winged and Masked Plovers, Grey-crowned and Red-breasted Babblers, White-browed and Spotted Scrub-Wrens, Striated and Rufous Field-Wrens, Southern and Western Yellow Robins, Grey, Brown and Black-winged Currawongs, and Black-backed and White-backed Magpies. In birdlists, introduced species should be included in their true systematic position.—Ed.
