### Bird Notes.

---

By Miss Josephine Heysen.

Pallid Cuckoo was first heard this season on 7th August; the Golden Bronze-Cuckoo (*Lamprococcyx plagosus*) on 12th August, whilst the Horsfield Bronze Cuckoo was heard on 16th May last. The Regent Honeyeaters (*Zanthoniza phrygia*) arrived at Ambleside on 15th May. During August they appeared in great numbers, and as long as one makes no movement the birds will come within touching distance in the gum-trees.
