

By R. C. Beck.

Tapley's Hill Road, Fulham, 30/11/1928.

A "yellow" Groundlark (*Anthus australis*) was seen on the Seaton Gold Links by me and several others recently. It was a young bird, and the parents showed much concern for the freak's safety. It was the first and only one of the colour that I had seen.

Two pairs of Welcome Swallows (*Hirundo neoxena*) have just safely launched second broods this season at my premises of five and four each. Rather goodly efforts for second broods.
