

By W. J. Harvey, Coombe, 6th May, 1929.

Since writing last I noted on 8th April a flock of Yellow-tailed Black Cockatoos (*Calyptorhynchus funereus*) flying over in the early morning, and later in the day 15 Galahs (*Kakatoe roseicapilla*). This latter species seems to come and go at any time, although until the spring of 1925 there were no records of it in the district. On the 13th a male Red-capped Robin (*Petroica goodenovii*) was seen, and on the 17th a Nankeen Night-Heron (*Nycticorax caledonicus*). On the 4th May a Spotted Harrier (*Circus assimilis*) and Grey-backed Silvereyes (*Zosterops halmaturina*) were observed.
