

*Bird Notes.*

---

Notes from Burnside.—Dr. H. M. Jay saw there, on 20th April, for the first time this autumn, many Regent Honeyeaters (*Zanthoniza phrygia*), and heard a Peaceful Dove (*Geopelia placida*). On Sunday night, 8th May, he heard Swans (*Chenopsis atrata*) passing over from east to west about 9 p.m. The night was dark and slight rain was falling.
