*Bird Notes.*

---

M. W. Mules, of Woodside, advised on 14th August, 1932, that he had seen there on 9/8/32 a ♂ Red-capped Robin (*Petroica goodenovii*). On 13/8/32 3 Black-winged Currawongs (*Strepera melanoptera*) were noticed flying over the house and calling frequently. A number of Purple-crowned Lorikeets (*Glossopsitta porphyrocephala*) are now to be seen in this locality feeding from the blue gums, which are now out in flower.
