*Bird Notes.*

*Rostratula australis*, Painted Snipe.

By James T. Gray, Orroroo.

I have two specimens:—(1) I obtained in a creek about two miles south of the town. It was feeding on the bank, and was the only bird of this species in a stretch of a couple of miles of creek which I went through twice. 2/1/1933, ♀; total length, 23 cm.; span of wings, 50.5 cm.; length of bill, 4.5 cm.; iris, black; legs and feet, green. (2) This specimen was brought to me by a shooting party, 16/1/1933, ♀. It was shot in a creek about 12 miles north-east of the town.
