

*Bird Notes.*

---

By H. H. Howard, Nargultie, via Streaky Bay.

Australian Pratincole, *Stiltia isabella*. One was seen at Flagstaff Landing on 26th January, 1935; Diamond Dove, *Geopelia cuneata*. A bird spent a few days at Nargultie on 26th February, 1936. The Neophema Parrots (*petrophila* ?) seem quite plentiful on the cliff faces and beach rocks at Point Brown, also in that locality on 19th January, 1936, were seen a Hooded Dotterel (*Charadrius cucullatus*) and two young ones. The Black-capped Sittellas, *Neositta pileata*, are again with us.
