

BIRD NOTES

later seen being fed by an Indian Dove (*Streptopelia chinensis*), Blackbird, and a White-plumed Honeyeater (*Meliphaga penicillata*) at various times. On November 25 the young Cuckoo was seen being fed by a Blackbird and a Dove, one on either side of it.—C. H. A. Lienau, Victoria Avenue, Unley Park.

Pallid Cuckoo (*Cuculus pallidus*).—A young bird was hatched in a Blackbird's nest (*Turdus merula*) built in a Mandarin tree at Unley Park in November, 1946. It was
