**BIRD NOTES**

---

with five normal birds south of Arthurton, Yorke Peninsula, in October, 1947. The bill was ivory-colored, and the feathers were pale fawn instead of black.—A. O. Crompton.

---

Swamp Harrier (*Circus approximans*).—Seen at Salisbury, S.A., on January 30, February 1, 4, 5, 1948. This is a new record for my property and is the one hundred and fifteenth species noted by me.—A. O. Crompton.

White-backed Magpie (*Gymnorhina hypoleuca*).—An albino bird was seen in company
