

ROCK PEBBLERS (*Polytelis anthopeplus*)
IN THE MALLEE

About 10 years ago, while on a trip to the Pinnaroo district, I observed twenty Rock Peblers about 8 miles south of the town in mallee country. Mr. Ryan, of Pinnaroo, told me that the birds were often seen in the district, and Dr. J. M. Bonnin has reported them 10 miles south of Pinnaroo in May, 1928 (see S.A. Orn., IX, 252).
