NATIONAL PARK EXCURSION, JULY 15, 1954.
By R. SCHODDE

An afternoon's excursion was held at National Park on July 15, 1954. Good weather conditions made for successful bird watching and the five attending members enjoyed themselves immensely. A bird-list of 35 species was compiled, notable species being the Wedge-tailed Eagle (*Uroaetus audax*), Buff-tailed Thornbill (*Acanthiza reguloides*) in *Eucalyptus viminalis* scrub at Long Gully; Shrike-tit (*Falcunculus frontatus*) and Little Pied Cormorant (*Microcarbo melanoleucus*) at the Railway Dam.
