

**BIRD NOTES**

Glossy Black Cockatoo (*Calyptorhynchus lathami*).

A small flock was observed perched in Sheoak trees (*Casuarina stricta*) growing amongst low scrub about  $\frac{1}{4}$  miles south of Muston P.O., Pelican Lagoon, Kangaroo Island, on August 11, 12 and 13, 1963. Excellent views were obtained at close range of the tail feathers of one of the birds.

H. M. COOPER.
