

**THE DUSKY MINER IN CORTLYNE
WATER RESERVE: AN ERROR**

My item on the Cortlyne Water Reserve (*S. Aust. Orn.*, 1971, 25, 235) lists the Dusky (Black-eared) Miner (*Myzantha obscura*) as a visitor to Cortlyne. I believe now that this is almost certainly incorrect, and that the birds I identified as Dusky Miners were immature Yellow-throated Miners (*M. flavigula*).

GORDON LEIBLICH.
