

BIRD NOTES

WHITE-BROWED WOOD-SWALLOW
ON KANGAROO ISLAND— A pair of this
species (*Artamus superciliosus*, not previously
recorded on Kangaroo Island), was observed
at Antechamber Bay for several hours on
26 October, 1971. I first noticed the birds
about midway between the two homesteads
on the property "Kent Park." My brother,
Mr. C. H. Lashmar, and his wife, also ob-
served them at close range with binoculars.
A. F. C. LASHMAR.
